Projects

Logistics ERP Completed

RR Transportes e Terraplanagem · Python, FastAPI, SQLite, Alembic, JavaScript, Tailwind CSS

- System that runs the operation of a trucking company: trips, costs, freight and maintenance, with a dashboard for the manager and an app for the driver that works without signal.
- Financial result per trip, with manager review, commissions and fuel, maintenance and ad-hoc costs backed by receipt photos
- Freight compared to the legal minimum rate (ANTT), with versioned tables updated from the official calculator
- Expiration and mileage-based maintenance alerts, with push notifications
- Security: scrypt-hashed passwords, revocable sessions, login attempt lockout and a strict CSP
- Change auditing, encrypted daily backups and weekly restore tests
- Automated tests (pytest and Playwright) and CI on GitHub Actions, with dependency scanning
- In production on a Linux VPS, with Caddy (HTTPS) and systemd

Experience

Main - Soluções em Software (internship) Maringá, Brazil

Sales and Project Assistant *Sep 2026 – present*
